GUILLEMOT (Birds on Sea)		50			Ca 315
PUFFIN (Birds)		62	4 (1 egg)	1	Ca 400

Unless otherwise indicated, figures represent pairs or nests.
"N" means present in numbers.

Miscellaneous Observations

Albatross reported on Bass Rock 3 June 1966, and stayed in the vicinity until about the end of September

Snow goose seen on Fidra 10 June 1966

Pied flycatcher seen on Inchkeith 18 June 1966

Please note that the numbers in this table may not agree with those in the main Forth Seabird Group tables. In some years some islands were counted more than once. When this happened the Forth Seabird Group figures reflect the main count.
